Community Health & Resilience
Student Health Center

Coordinators:
David Laubach, MPH
Carman North, MPH, CPH
Our Mission

The community health team leverages evidence-based strategies to reduce the impact of illness on student success by facilitating layered prevention behaviors, understanding campus disease patterns, and advancing community resilience to public health emergencies.
Health & Illness Support Form

- Guidance provision and resource linkages
- Instructor notifications
- Data collection instrument
Outreach and Guidance

• Outbreak mitigation guidance
• Collaborating with campus partners on targeted communications
• Community health promotion
Vaccination

• On-site vaccination and satellite clinics
• Collaborative education campaigns
• Community Health Ambassadors program
Campus Health Surveillance

• Assessing patterns of disease and protective factors
• Targeted interventions
• Monitoring emerging illnesses of concern
